

Version with Markings to Show Changes Made

In the Specification:

Title beginning at page 1, line 1:

Method for producing a[t least one] test piece[, in particular consisting of fiber reinforced material,] for testing the quality of an adhesive joint

Title beginning at page 1, line 4:

1. [Technical] Field of the Invention

Paragraph beginning at page 1, line 6:

The present invention relates generally to methods for testing components and more particularly to a method for determining [or checking] material characteristic data of a component [consisting of fiber reinforced material. in particular of fiber reinforced plastic].

Paragraph beginning at page 5, line 25:

As shown[It is schematically arranged] in Fig. 3, [that] the projections 8 which are severed and bonded to each other in Fig. 2 as test pieces 14 can also be divided into individual test piece sections 16. These test piece sections 16 are firstly easier to handle than the test piece 14 during the testing of the adhesive joint on account of their smaller size. Secondly, a plurality of tests of an adhesive joint can be carried out in this manner, which increases the accuracy of the result of the testing of the quality of the adhesive joint.
